SUMMARY

Highly motivated Computer Science and Business Systems undergraduate skilled in Python, Java, SQL, HTML, CSS, and web development. Strong foundation in Data Structures, DBMS, OOP, and problem-solving with interest in software development and scalable applications. Quick learner with strong analytical, communication, and teamwork skills.

EDUCATION

B.tech - Computer Science & Business Systems (CSBS), Vellore Institute of Technology, Vellore
CGPA : 8.2/10

SKILLS

Programming Languages

- Python | Java | C | SQL

Database Technologies

MySQL | RDBMS

Soft Skills

- Problem Solving | Team Collaboration | Communication Skills | Time Management | Analytical Thinking | Leadership | Presentation Skills

Web Technologies

- HTML5 | CSS3 | JavaScript

Core Computer Science Concepts

- Data Structures & Algorithms (DSA) | Object-Oriented Programming (OOP) | DBMS | Operating Systems | Computer Networks | SDLC

Tools & Platforms

- GitHub | Visual Studio Code | Canva | MS Excel | MS PowerPoint | MS Word

LANGUAGES

English | French

PROJECTS

Smart Healthcare Infrastructure Planner (SHIP)

- Developed a healthcare planning system to identify optimal clinic locations using data analytics and optimization techniques.
- Applied Operations Research concepts such as Facility Location Optimization, ILP, and Monte Carlo Simulation.
- Implemented demand forecasting and geospatial analysis to improve healthcare accessibility and population coverage.

Tech Stack: Python | Pandas | NumPy | OR-Tools | Data Analytics | GIS Mapping

Student Progress & Guidance Platform

- Developed a student guidance platform to track academic progress, skills, certifications, and placement preparation.
- Implemented skill gap analysis and smart recommendation features to help students identify missing competencies.
- Designed dashboard-based UI with progress tracking, semester planning, and personalized career guidance features.

Tech Stack: UI/UX Design | Dashboard Development | Data Analysis | Recommendation System | System Architecture

Smart Team Formation Software

- Developed a team formation platform that creates balanced student teams using academic, behavioral, and soft skill analysis.
- Built responsive full-stack application with automated compatibility scoring and team allocation features.
- Improved team diversity and reduced manual grouping effort through data-driven algorithms.

Tech Stack: Next.js | React | TypeScript | Tailwind CSS | JavaScript

COURSES

Web Development Fundamentals, IBM SkillsBuild
